PROJECTS:

➔ **Invoice Intelligence System**
Python | LLMs | Document Processing
- Built an AI system to extract and structure data from unstructured invoices using document processing and LLMs.

➔ **Alter — AI ATS Resume Analyzer**
Python | Streamlit | Generative AI | MongoDB
- Built an AI-powered ATS analyzer with resume scoring, keyword matching, skill-gap analysis, cover-letter generation, and interview preparation.

➔ **Movie Recommendation System**
Python | Pandas | Machine Learning | MongoDB | Streamlit
- Developed a movie recommendation system with similarity-based recommendations, search, watchlist, and MongoDB integration.

➔ **Customer Churn Analysis**
Python | Pandas | NumPy | Matplotlib | Seaborn
- Analyzed customer data to identify churn patterns and key factors across customer segments, plans, and locations.
